José-María Trifaró Cellular and molecular mechanisms in hormone and neurotransmitter secretion 1

REVIEW/SYNTHÈSE

M. J. Dauncey Activity and energy expenditure 17

ARTICLES

Gerald F. McCarthy, Riaz Farookhi, and James R. Brawer Plasma gonadotropin patterns characterizing the development of polycystic ovaries in the estradiol valerate treated rat 28

Peter James O'Brien, C. David Ianuzzo, Gordon W. Moe, Terry P. Stopps, and Paul W. Armstrong Rapid ventricular pacing of dogs to heart failure: biochemical and physiological studies 34

Gordon T. Bolger, Shlomo Abraham, Nissim Oz, and Ben Avi Weissman Interactions between peripheral-type benzodiazepine receptor ligands and an activator of voltage-operated calcium channels 40

Frans H. H. Leenen and Giannoula Klement Dietary sodium restriction and blood pressure response to sympathetic blockade in young versus adolescent spontaneously hypertensive rats 46

D. J. Parry and S. DiCori The relationship between post-tetanic potentiation of motor units and myosin isoforms in mouse soleus muscle 51

H. Ammann, J. Noël, Y. Boulanger, and P. Vinay Relationship between intracellular ATP and the sodium pump activity in dog renal tubules 57

M. W. Wolowyk, S. Howlett, T. Gordon, and L. C. H. Wang Smooth muscle contractility and calcium channel density in hibernating and nonhibernating animals 68

A. Wollin Uptake and methylation of histamine by dispersed gastric mucosal cells and its possible influence on acid secretion 71

P. O. Magner and M. L. Halperin Effect of metabolic acidosis on glucose reabsorption in rats with acute hyperglycemia 79

Simon C. J. Pedder, Robert I. Wilcox, John M. Tuchek, Dennis D. Johnson, and R. D. Crawford Attenuation of febrile seizures in epileptic chicks by *N*-methyl-D-aspartate receptor antagonists 84

Ignazio La Delfa, Yifan Xia, and Terrence F. Blaschke Dose-dependent inhibition of cyclosporine metabolism in mice by fluconazole 89

A. L. Alonso-Gómez, M. Tejera, M. Alonso-Bedate, and M. J. Delgado Response to pinealectomy and blinding in vitellogenic female frogs (*Rana perezi*) subjected to high temperature in autumn 94

Yasuo Kizawa, Michiko Shinkai, and Issei Takayanagi Effects of chronic nicotine treatment on nicotinic receptors in the rabbit urinary bladder 99

Carmen González, Carmen Martin, Edith Hamel, Elena Galea, Bernardino Gómez, Salvador Lluch, and Carmen Estrada Endothelial cells inhibit the vascular response to adrenergic nerve stimulation by a receptor-mediated mechanism 104

John P. Headrick and Roger J. Willis Relation between the O_2 supply:demand ratio, MVo_2, and adenosine formation in hearts stimulated with inotropic agents 110

Ji-Ming Ye, Eric Q. Colquhoun, Manthinda Hettiarachchi, and Michael G. Clark Flow-induced oxygen uptake by the perfused rat hindlimb is inhibited by vasodilators and augmented by norepinephrine: a possible role for the microvasculature in hindlimb thermogenesis 119

RAPID COMMUNICATIONS / COMMUNICATIONS RAPIDES

Hon C. Kwan, Tet H. Yeap, Bai C. Jiang, and Donald Borrett Neural network control of simple limb movements 126

D. B. Jennings and T. G. Flynn The disulfide bonded ring of iso-rANP, unlike that of rANP, has potent cardiovascular activity 131

Francis R. Sutherland, Roy M. Preshaw, and Eldon A. Shaffer The effect of cyclosporine A on bile secretion in dogs 136

FEBRUARY / FÉVRIER

ARTICLES

P. Joy Dunmore, S. H. Song, and Margot R. Roach A comparison of the size of fenestrations in the internal elastic lamina of young and old porcine aortas as seen with the scanning electron microscope 139

Daniel Lamontagne, Nobuharu Yamaguchi, Chantal Lambert, Jacques de Champlain, and Réginald Nadeau Absence of prejunctional sympathetic effect of amiodarone in hearts of open-chest anesthetized dogs 144

Lee M. Sanford and Bernard Robaire Interaction of season and estradiol in the regulation of gonadotropin secretion in the adult ram 150

Yves Deshaies, Gilles Lortie, and Denis Richard Lipoprotein lipase activity in white adipose tissue of rats subjected to exercise–rest cycles 157

Wolfgang Walz and Diane E. Harold Brain lactic acidosis and synaptic function 164

Cristina E. Carnovale, Juan A. Monti, Viviana A. Catania, and Maria C. Carrillo Possible role of blood insulin levels on glutathione *S*-transferase activities from different tissues of male rats 170

J. A. Thornhill and Q. J. Pittman Hemodynamic responses of conscious rats following intrathecal injections of prodynorphin-derived opioids: independence of action of intrathecal arginine vasopressin 174

C. G. Nichols and W. J. Lederer The role of ATP in energy-deprivation contractures in unloaded rat ventricular myocytes 183

Herbert Wiesinger, Susanne Klaus, Gerhard Heldmaier, Odette Champigny, and Daniel Ricquier Increased nonshivering thermogenesis, brown fat cytochrome-*c* oxidase activity, GDP binding, and uncoupling protein mRNA levels after short daily cold exposure of *Phodopus sungorus* 195

F. J. Burczynski, J. B. Moran, Z.-S. Cai, and E. L. Forker β-Lactoglobulin enhances the uptake of free palmitate by hepatocyte monolayers: the relative importance of diffusion and facilitated dissociation 201

B. L. Tepperman and B. D. Soper Effect of sialoadenectomy on ethanol-induced gastric mucosal damage in the rat: role of neutrophils 207

E. A. Gorodetskaya, S. F. Dugin, M. A. Golikov, V. I. Kapelko, and O. S. Medvedev The cardiac contractile function and hemodynamic control in rats after chronic adriamycin treatment 211

Symposium

Nausea and vomiting: a multidisciplinary perspective (Nausée et vomissement : une perspective multidisciplinaire)

Ottawa, Ontario, Canada
November 12–13, 1988 / du 12 au 13 novembre 1988

R. K. Harding Introduction: Concepts and conflicts in the mechanism of emesis 218

Kenneth R. Brizzee Mechanics of vomiting: a minireview 221

David O. Carpenter Neural mechanisms of emesis 230

Alan D. Miller Respiratory muscle control during vomiting 237

Ivan M. Lang Digestive tract motor correlates of vomiting and nausea 242

I. N. C. Lawes The origin of the vomiting response: a neuroanatomical hypothesis 254

Gregory L. King Animal models in the study of vomiting 260

Robert A. Fox, Merylee Corcoran, and Kenneth R. Brizzee Conditioned taste aversion and motion sickness in cats and squirrel monkeys 269

R. A. Leslie, Y. Shah, M. Thejomayen, K. M. Murphy, and H. A. Robertson The neuropharmacology of emesis: the role of receptors in neuromodulation of nausea and vomiting 279

John Kucharczyk and R. K. Harding Regulatory peptides and the onset of nausea and vomiting 289

Charles M. Oman Motion sickness: a synthesis and evaluation of the sensory conflict theory 294

David J. Stewart Cancer therapy, vomiting, and antiemetics 304

G. J. Sanger New antiemetic drugs 314

P. L. R. Andrews, C. J. Davis, S. Bingham, H. I. M. Davidson, J. Hawthorn, and L. Maskell The abdominal visceral innervation and the emetic reflex: pathways, pharmacology, and plasticity 325

March/Mars

The 1989 James A. F. Stevenson Memorial Lecture (La Conférence commémorative James A. F. Stevenson 1989)

Peter B. C. Matthews The knee jerk: still an enigma? 347

ARTICLES

Jaques Belik, Anna Sienko, and R. Bruce Light The effect of repeated intermittent hypoxia on pulmonary vasoconstriction in the newborn 355

Richard Briand, Nobuharu Yamaguchi, Jacques Gagne, Tomohiko Kimura, Lisa Farley, Sylvain Foucart, Reginald Nadeau, and Jacques de Champlain Corelease of neuropeptide Y like immunoreactivity with catecholamines from the adrenal gland during splanchnic nerve stimulation in anesthetized dogs 363

D. S. Riddick, J. E. Mackie, T. E. Massey, and G. S. Marks 3,5-Diethoxycarbonyl-2,6-dimethyl-4-ethyl-1,4-dihydropyridine inactivates rat liver cytochrome *P*-450c, but not its orthologue, rabbit lung form 6 370

Graciela S. Zunini, Sheldon H. Roth, and Gregory E. Lucier The inhibitory effect of halothane on the emetic response in the ferret 374

M. Y. Doucet, T. R. Jones, and A. W. Ford-Hutchinson Responses of equine trachealis and lung parenchyma to metacholine, histamine, serotonin, prostanoids, and leukotrienes *in vitro* 379

Carl F. Rothe, A. Dean Flanagan, and Roberto Maass-Moreno Reflex control of vascular capacitance during hypoxia, hypercapnia, or hypoxic hypercapnia 384

J. Thornhill, R. St. Onge, and L. Gregor Naloxone's effect on the inotropic and chronotropic responses of isolated, electrically stimulated or spontaneously beating rat atria 392

H. Sonnenberg, U. Honrath, and D. R. Wilson Effects of increased perfusion pressure on medullary collecting duct function 402

Jiri Widimsky, Jr., Otto Kuchel, Waldemar Debinski, and Gaétan Thibault Dissociation between right atrial pressure and plasma atrial natriuretic factor following prolonged high salt intake 408

Takeshi Fujii, Yasushi Kuraishi, Toshikazu Okada, and Masamichi Satoh Bifemelane induces translocation of protein kinase C in the CA3, but not the CA1, region of guinea-pig hippocampus 413

T. S. Hakim and J. P. Mortola Pulmonary vascular resistance in adult rats exposed to hypoxia in the neonatal period 419

Kaushik P. Patel and Ping L. Zhang Attenuated renal responses to atrial natriuretic factor in streptozotocin-induced diabetic rats 425

Richard I. Ogilvie and Danuta Zborowska-Sluis Effects of nifedipine and captopril on vascular capacitance of ganglion-blocked anesthetized dogs. 431

Michael T. Piascik, Roslynn Collins, and Brent T. Butler Stereoselective and nonstereoselective inhibition exhibited by the enantiomers of verapamil 439

Jan D. Huizinga, Irene Berezin, Edwin E. Daniel, and Edwin Chow Inhibitory innervation of colonic smooth muscle cells and interstitial cells of Cajal 447

M. Allam, C. Saunier, A. Sautegeau, and D. Hartemann The inotropic effect of digoxin on an isolated rat heart in hypercapnia and (or) hypoxia 455

RAPID COMMUNICATION / COMMUNICATION RAPIDE

Gary D. Lopaschuk and Marguerite A. Spafford Acute insulin withdrawal contributes to ischemic heart failure in spontaneously diabetic BB Wistar rats 462

April/Avril

ARTICLES

Reina Bendayan, Edward M. Sellers, and Melvin Silverman Inhibition kinetics of cationic drugs on *N'*-methylnicotinamide uptake by brush border membrane vesicles from the dog kidney cortex 467

Andrew H. Werber, MaryPat C. Fitch-Burke, David G. Harrington, and Jina Shah No rarefaction of cerebral arterioles in hypertensive rats 476

R. Tiede, S. Sareen, and P. K. Singal Transferrin delays oxygen radical induced cardiac-contractile failure 480

S. Ramanadham, G. H. Cros, J. J. Mongold, J. J. Serrano, and J. H. McNeill Enhanced *in vivo* sensitivity of vanadyl-treated diabetic rats to insulin 486

Elsa I. Mangiarua and Robert M. K. W. Lee Increased sympathetic innervation in the cerebral and mesenteric arteries of hypertensive rats 492

Ravi D. Kaushal and Thomas W. Wilson Effect of furegrelate on renal plasma flow after angiotensin II infusion 500

A. M. Perks, J. J. Dore, R. Dyer, J. Thom, J. K. Marshall, T. Ruiz, B. A. Woods, E. Vanderhorst, and S. Ziabakhsh Fluid production by *in vitro* lungs from fetal guinea pigs 505

Brian Rodrigues and John H. McNeill Cardiac dysfunction in isolated perfused hearts from spontaneously diabetic BB rats 514

B. P. C. Chow, E. A. Shaffer, and H. G. Parsons Absorption of triglycerides in the absence of lipase 519

P. F. Mercer and R. L. Kline The influence of renal nerves on electrolyte excretion in conscious and anesthetized rats fed or fasted overnight 524

Gordon M. Wahler, Nancy J. Rusch, and Nicholas Sperelakis 8-Bromo-cyclic GMP inhibits the calcium channel current in embryonic chick ventricular myocytes 531

Giuseppe A. Sagnella, Donald R. J. Singer, Nirmala D. Markandu, Graham A. MacGregor, David G. Shirley, Johanne Tremblay, and Pavel Hamet Atrial natriuretic peptide – cyclic GMP coupling and urinary sodium excretion during acute volume expansion in man 535

Sandra Bacman, Leonor Sterin-Borda, Livia Lustig, Berta Denduchis, and Enri Borda Antilaminin IgG binds and interacts with cardiac cholinergic receptors 539

RAPID COMMUNICATION / COMMUNICATION RAPIDE

C. Zona, V. Tancredi, E. Palma, G. C. Pirrone, and M. Avoli Potassium currents in rat cortical neurons in culture are enhanced by the antiepileptic drug carbamazepine 545
